

Crane Repair Service

Call: 253-848-9473

Preventative Maintenance on Boom Trucks

You have a job to do.

Your customers depend on you. You depend on your crane.

When it's down, you're not making money.

Major crane repairs = lost time + unexpected costs

Many repairs, on components like the boom, can eat into your profits, especially when they hit you in the middle of a job or during your busy season. How can you detect worn components sooner, reduce your Total Cost of Ownership (TCO) and minimize repairs?

We recommend regular **Preventative Maintenance**:

- INSPECT your crane in-depth (above & beyond an annual inspection)
- CHECK & MEASURE critical areas for wear
- LUBRICATE all major components
- Make MINOR ADJUSTMENTS

How Often?

- Heavy Use = Monthly PM
- Moderate Use = Quarterly PM
- Light Use = Pre-Job PM

Don't have time? Don't have the extra man-power? Don't have the in-house crane expertise? Need to make sure your crane is ready for a big job?

Call **Crane Repair Service** today for a quote.

Drop off trucks at our shop or we can go to you.
